

ESET Fix is a program designed for advanced computer users. Its main objective is to clean up all the issues from your system and make it faster and more efficient. This application has been tested by ESET to ensure that it's 100% malware-free, so you can install it without any risk at all. There are a number of features included in the application which makes it a great solution for all your PC problems. You can tweak some settings, update drivers or uninstall programs that seem to be causing issues on your computer among other things. In order to get the most out of this program you would need "admin rights" on your PC since some actions require elevated privileges to run correctly. Giga Magazine's "Simple Guide to PC Optimization" covers cleaning junk files, setting up an anti-virus, having a startup manager and using a registry cleaner. It points out that there are a lot of "free" tools on the internet for cleaning your computer. However it recommends not to use them since they may be dangerous. Giga Magazine lists ESET as one of the legitimate programs for cleaning up your computer.
